

SafeRIDE Certified for Retailers

On-going Driver Monitoring

Do you know the driving record and criminal history of your drivers?

Understanding the behavior of the independent drivers who deliver packages to the homes of your customers is critical to your company's reputation, the safety of your customers, and the well-being of your business. This enables the ability to take timely corrective action to dangerous driver behavior or identified criminal activity.

SafeRIDE Certified is a unique, risk prevention and consumer safety service that delivers critical, ongoing criminal and motor vehicle record monitoring on all your drivers.

A Cloud-based infrastructure allows you to easily optimize driver safety with streamlined access to up-to-date driver analytics and reporting. Nationwide coverage enables clients to manage their risk across all locations and minimizes total liability.

SafeRIDE Certified will help retailers ensure the reduction of risk and liability, improve margins, and ensure the safety of their customers.

Be an advocate for customer safety!

The Components of SafeRIDE Certified

Ongoing Driver Monitoring

- **Continuous Criminal and Motor Vehicle Record (MVR) monitoring**

SafeRIDE Certified proactively screens your drivers and alerts you of any criminal violations or MVR infractions including moving and non-moving citations, suspensions, expirations, and revocations.

SafeRIDE Certified offers a new approach to driver and consumer safety and is a foundational tool that retailers can use to ensure the reduction of risk and liability, improve margins, and ensure the safety of their customers. This will also help you to stand apart from competition.

Ignoring Consumer Safety is Risky Business

Monitor your Drivers to Help Mitigate Risk and Liability Exposure

The Benefits of Continuous Criminal & Driver License Monitoring

- Receive alerts about violations, suspensions, or revocations. This eliminates the pitfall of the yearly 'grace period' between annual MVR orders and allows for quick and corrective action with drivers.
- The service is automated and managed by experts, eliminating interaction with state jurisdictions and different MVR formats.
- Companies have recognized a significant reduction in preventable accidents because they have taken the necessary steps to ensure that only qualified and licensed drivers are operating company and/or personal vehicles.
- Continuous driver license monitoring is effortless by comparison to the once-yearly MVR check. The system minimizes administrative burden with exception reporting (activity alerts vs. annual MVR reviews).

Continuous Driver Monitoring from CARCO makes it easy for your business to manage your drivers and mitigate risk exposure.

How Continuous Monitoring Works

Criminal and MVR monitoring provides continuous reporting that allows you to receive violations as they are reported on a driver's criminal and MVR record. If there are no changes, there is nothing to review. Record changes may include citations, suspensions, expirations or positive updates such as restored privileges and reissues.

It's easy and is as simple as:

1. You provide CARCO with a roster of your active drivers.
2. CARCO will obtain a base line MVR and criminal history search, if one has not already been established.
3. CARCO will provide proactive continuous monitoring of your active drivers' motor vehicle records and criminal records.
4. If there is no activity, there is nothing to review.
5. If there is activity, you will be notified.
